PROJECTS

Reminder

- * Developed a Python-based Reminder Application with a user-friendly tkinter GUI, allowing users to set and manage reminders with optional repeat intervals.
- * Implemented data persistence using **pickle** to save and load reminders, ensuring continuity across sessions.
- * Designed a background process to check and trigger reminders in real-time, using datetime for scheduling and plays sound for audio notifications.
- * **Utilized multithreading** to maintain GUI responsiveness while running the reminder-checking loop concurrently.
- * Integrated robust error handling and user feedback mechanisms to validate inputs and guide users through pop-up message boxes. Link : [Reminder using python](#)

CROWD FUNDING Kickstarter

: Developed a data visualization Kpi's using data visualization Tools which has done in Internship in AIVariant platform
